OBJECTIVE

Highly analytical Software Engineer with 8 years of experience (6 years focused on senior-level web development) bridging the gap between corporate reliability and agency agility. Expert in Laravel, Vue.js, and Mobile development (Kotlin/Flutter), with a proven track record of optimizing database performance through server-side caching and architecting high-traffic ticketing systems. Dedicated to technical excellence as an Individual Contributor, ensuring long-term product vision through clean code and robust system design.

EXPERIENCE

Junior Engineer

Indonesia Comnet Plus (SIMBIKA)

2019 – 2021 | Bandung, Indonesia

- **Infrastructure Management:** Mengelola pemeliharaan server dan layanan jaringan berskala korporat, memastikan integrasi IT service management berjalan tanpa hambatan.
- **Enterprise Reliability:** Berkontribusi dalam menjaga stabilitas sistem operasional lapangan dengan standar dokumentasi dan prosedur kerja yang ketat khas lingkungan korporat.

Senior Web Developer

Pentacode Digital

2021 – NOW | Bandung, Indonesia

- **Ticketing System Architect:** Merancang dan mengembangkan platform "takkenalmakatakgojang.com" untuk menangani lonjakan trafik tinggi saat penjualan tiket, memastikan ketersediaan sistem tetap stabil.
- **E-Commerce Specialist:** Membangun ekosistem e-commerce (Prostreet, Sijalu) menggunakan **WooCommerce & Laravel**, dengan fokus pada kustomisasi fitur yang meningkatkan konversi penjualan.
- **HRIS Product:** Membangun dan mengkoordinasi kebutuhan produk.
- **Performance Engineering:** Mengimplementasikan sistem *server-side caching* yang secara signifikan mengurangi beban database dan mempercepat waktu respons aplikasi.
- **High-Stakes Web Development:** Mengembangkan *corporate identity* digital untuk klien global seperti Wadzipay, memastikan keamanan data dan UI/UX yang intuitif.
